### Section 3: Submission on proposal

Please detail your submission below. Attach additional pages if necessary.

I/we (tick one option only):

- Support the application/s
- Oppose the application/s
- Neither support nor oppose the application/s (neutral submission)

My submission:

APP1A3988 / LU/0323/21

I oppose this application.

- Global contracting solutions does not have any experience in waste incineration. It is a scrap metal business.
- They are known for violating resource consent conditions in their Hamilton operations.
- They have not included any cultural assessments with the local Iwi and hapū.
- The incinerator will produce dioxins that are cancer causing, even in extremely low levels. These will be emitted into the air & will settle on the land & in the water. There is no safe level of dioxins & they bio-accumulate.
- The proposed site is totally unsuitable for a large scale waste incinerator. It is neighbouring to Fonterra, & isn't an appropriate business to have nearby.

The reasons for my views are:

- I value human life & health for all. I don't want Te Anau residents negatively impacted due to the cancer causing business activity that is proposed.
- I value honesty & relationship in life & business ventures, & it seems they offer neither.

This is a submission on:

**APPLICANT'S NAME:** Global Contracting Solutions Limited

**LOCATION:** 401 Racecourse Road, Te Awamutu

I am not a trade competitor for the purposes of section 308B of the Resource Management Act 1991.

I am directly affected by an effect of the subject matter of the submission that—

All parts of the application

**My submission is:**

**Support** parts or all of  **Oppose** parts or all of  **are neutral** parts or all of   
include—

- *the reasons for your views.*

GCS Ltd initially requested for the application to be a non-notified resource consent application which rings alarm bells from the outset. This would appear to be for the purposes of hiding information from the Te Awamutu public & shows a disregard for the concerns of the people of Te Awamutu. My submission includes, but is not limited to, the following:

1. GCS Ltd has never built or operated a waste incinerator plant before and it is concerning who else may be involved in the operation as a partner.
2. Health – there has been no human health risk assessment submitted with the application. The incinerator is proposed to be located within close proximity to residential housing (current & proposed) & future), schools & play centres, food production plant (dairy factory) and farm land
3. Environment –
  - a. there has been no environmental impact statement.
  - b. The plant will emit toxins & dioxins harmful to human health.
  - c. The plant will also generate large amounts of highly toxic waste that will require to be put into landfill
  - d. There has been no land contamination assessment included
  - e. Unsafe storage of contaminated wastewater on site & other hazardous substances that could find their way into the environment & river system. This is additional concern being a flood zone
  - f. The transport of waste into the town adding extra trucks on the roads and pollution
  - g. Stormwater discharged into Mangapiko stream. It is unlikely that proposed filtration & settlement methods will remove toxins etc. therefore contaminating the Mangapiko stream, Waipa River & Waikato River
4. GCS Ltd have previous history of breaching resource consent conditions and has been prosecuted by Hamilton CC

5. GCS Ltd have grossly unstated the amount of diesel fuel storage & usage required to fire the incinerator.
6. Te Awamutu does not have the fire brigade (only volunteer crew) to handle any large-scale emergencies I.e spills, fires etc.
7. There has been no formal Cultural Impact Assessment
8. Waste incinerator plants go against New Zealand's climate emission goals targets, encourages consumerism & discourages recycling or re-purposing.

Burning tires and rubbish can have several adverse effects on human health and the surrounding environment. The dangers of burning tires and rubbish are listed below.

#### Air pollution

Burning tires and rubbish release a significant amount of toxic pollutants into the air. These pollutants include sulphur dioxide (SO<sub>2</sub>), nitrogen oxides (NO<sub>x</sub>), carbon monoxide (CO), volatile organic compounds (VOCs), and particulate matter (PM), including fine particles known as PM<sub>2.5</sub>.

These pollutants can contribute to heavy smog formation, respiratory issues and other negative health effects in nearby communities.

#### Health risks

The emissions from burning tires and rubbish contain a range of harmful substances, including heavy metals (such as lead, cadmium, and mercury), polycyclic aromatic hydrocarbons (PAHs), dioxins, and furans.

These pollutants are known to be carcinogenic and can have adverse effects on the respiratory, cardiovascular, and reproductive systems. Prolonged exposure to the emissions from tire burning can increase the risk of respiratory diseases, including asthma, bronchitis, and even lung cancer.

#### Soil and water contamination

The ash generated from burning tires and rubbish can contain toxic substances that can contaminate nearby soil and water bodies. When tire and rubbish ash is deposited onto the ground or carried away by rainwater, it can leach pollutants into the soil and water, potentially affecting ecosystems and posing risks to human health through the food chain and drinking water sources.

#### Burning tires smell

The smell of burning tires and rubbish is also quite unpleasant. This can upset the surrounding community, decrease property value and damage the reputation of the surrounding area, which also decreases tourism prospects.

#### Environmental impact

The release of pollutants from tire and rubbish burning also contributes to environmental degradation and can cause harm to ecosystems. This environmental impact may:

Damage plant life.

Affect aquatic organisms.

Damage surrounding habitats.

Disrupt the balance of ecosystems.

The pollutants are harmful to all living organisms within close proximity to the burning tires.

We do not want an incinerator like this in our community for the following reasons:

The location of a heavy industrial operation immediately next to existing and planned residential housing, schools, childcare and food businesses, and operating 24 hours a day, 7 days a week, is totally inappropriate and conflicts with the intentions of the Waipā District Plan and Growth Strategy for the community. Despite supposed landscaping mitigation measures, the very large size of the building and stacks does not fit in with the area. It will dominate, have a significant impact on the landscape and turn the entire area into the feel of an industrial zone.

There will be significant additional traffic and heavy vehicles in this residential area, adding to air pollution and severely impacting the rights of nearby residents to quiet enjoyment of their properties. It will change the nature of the community from a quiet residential street to an unsafe and busy thoroughfare of trucks. We don't believe that this noise has been satisfactorily considered in the applicant's noise assessment. The high traffic volume will also impact the whole community as these heavy vehicles will enter the area from various directions. Our road surfaces are not adequately maintained now so adding this volume of heavy vehicle traffic will have costly consequences.

We are very concerned that Global Contracting Solutions does not appear to have any experience of waste incineration operations. It is a scrap metal business. The company does, however, have a track record of violating resource consent conditions in their Hamilton operations. This incinerator is said to be new technology in New Zealand and it is surprising and doesn't inspire confidence that what appears to be a relatively small company with two directors is undertaking such a multimillion dollar development.

The site is totally unsuitable for a large-scale waste incinerator. The current "Specialised Dairy Industrial Area" designation means that the land use is intended to ensure that any activity there was aligned with Fonterra's activities. It is not appropriate to have an incinerator burning millions of tyres next to a milk production facility.

This area is not identified as an area for industrial development in the District Plan. Two areas are identified for industrial growth: at Bond Road and Paterangi Road.

The site is on a floodplain. Most of the site is designated a High Risk Flood Zone. The river has been straightened and narrowed over time to enable development and this is now considered one of the major causes of flooding. Allowing rivers the ability to spread to accommodate severe rainfall events in future protects infrastructure, business and housing from inundation. In light of recent severe weather events and, we are told, the likelihood of more in the future, it is reckless to allow a project of this scale to proceed on this site.

The odour and dust have not been adequately assessed. There is no indication of how often the start up/maintenance will be done and levels exceeded.

There has been no human health assessment of this proposal. The incineration plant is a hazardous facility with serious risks of harm to human health. The plant will emit cancer-causing dioxins, and furans, sulphur dioxide, nitrogen oxide, mercury and particulate matter will be released into the air.

There is no risk assessment of the possibility of fire or explosion, despite the storage of hazardous materials and highly flammable feedstock. The community only has a volunteer fire brigade.

Almost all the material for this facility will need to be imported from outside of the district and it will be impossible to know what ongoing hazards, risks and emissions exist. This is not a proposal for the benefit of the community. It also means that the company is more likely to burn recyclable materials and other things because it must always continue to operate. That will directly work against efforts to minimise waste.

The incinerator will produce dioxins that are cancer-causing even in extremely low levels. These will be emitted into the air and will settle on the land and in the water. There is no safe level of dioxins, and these bio accumulate, meaning that over time they build up in human fat tissue and in animals.

There is no assessment of land contamination included in the application. International research shows that the land surrounding incinerators can be extensively contaminated with heavy metals, microplastics and other toxic emissions including dioxin.

Stormwater from the site will be discharged into the Mangapiko Stream. This water is likely to be contaminated with heavy metals and dioxin. Filtration systems and settlement ponds do not eliminate all of the toxic products meaning these will make their way into the waterways.

One of the emissions from burning tyres/tyre derived fuel is zinc oxide, which has not been modelled and which is highly toxic to aquatic life.

The huge earthworks over several years will impact the health and wellbeing of the Mangapiko River.

The incinerator will be a massive contributor to climate change. It will directly add about 150 kilo tons per year of CO<sub>2</sub>. The incinerator would produce 23 tonnes/day of toxic ash, which has to be landfilled. Incinerator ash contains heavy metals, microplastics and dioxins. The storage of highly contaminated wastewater and other hazardous substances on site risks spills and wider contamination.

Incineration does not replace the need for landfills; instead it takes ordinary materials and concentrates them into more toxic ash.

The Waipā District Council has a great waste minimisation plan and opportunities for more comprehensive zero waste strategies that would fit with the goals of minimise wastes, while meeting community aspirations for a healthy environment, job creation and mitigation of climate emissions.

We see no benefits at all of this proposal for Te Awamutu. The town will be severely disadvantaged and adversely affected by it.

I am/am not directly affected by an effect of the subject matter of the submission that—

- (a) adversely affects the environment; and
(b) does not relate to trade competition or the effects of trade competition.

The specific parts of the application that my submission relates to are:

Impact on the environment, visually and with emissions being toxic.

My submission is:

Support parts or all of [ ] Oppose parts or all of [x] are neutral parts or all of [ ] include—

- the reasons for your views.

I don't agree with the impact this will have on our environment, the toxic emissions and visual impact outweigh any positive input with employment. I believe landfill is better for waste we can't recycle or repurpose.

I seek the following decision from the consent authority:

give precise details, including the parts of the application you wish to have amended and the general nature of any conditions sought

Further review on impact to the land and streams.

I wish (or do not wish) to be heard in support of my submission.

- I do wish to be heard in support of my submission (this means that you will speak at the hearing)
I do not wish to be heard in support of my submission (this means that you will not be advised of the date of the hearing and will not speak at the hearing)
If others make a similar submission I will consider presenting a joint case with them at the hearing.

You must tick one of the boxes above, otherwise it will be deemed that you do not wish to be heard and we will not advise you of the date of the hearing.

- I have served a copy of my submission on the applicant. (this is required by section 96(6) (b) of the Resource Management Act 1991)

I request/~~do not request~~\*, pursuant to section 100A of the Act, that you delegate your functions, powers, and duties to hear and decide the application to one or more hearings commissioners who are not members of the local authority.

### Notes to submitter

If you are making a submission to the Environmental Protection Authority, you should use form 16B. The closing date for serving submissions on the consent authority is the 20th working day after the date on which public or limited notification is given. If the application is subject to limited notification, the consent authority may adopt an earlier closing date for submissions once the consent authority receives responses from all affected persons. If you are a trade competitor, your right to make a submission may be limited by the trade competition provisions in Part 11A of the Resource Management Act 1991. You must serve a copy of your submission on the applicant as soon as reasonably practicable after you have served your submission on the consent authority. If you make your submission in hard copy please deliver to Waipa District Council, 101 Bank Street, Te Awamutu or 23 Wilson Street, Cambridge or post to Private Bag 2402, Te Awamutu 3840. If you make your submission by electronic means, a signature is not required. Electronic submissions on resource consent applications must be directed to [submissions@waipadc.govt.nz](mailto:submissions@waipadc.govt.nz). If you make a request under section 100A of the Resource Management Act 1991, you must do so in writing no later than 5 working days after the close of submissions and you may be liable to meet or contribute to the costs of the hearings commissioner or commissioners. You may not make a request under section 100A of the Resource Management Act 1991 in relation to an application for a coastal permit to carry out an activity that a regional coastal plan describes as a restricted coastal activity. Please note that your submission (or part of your submission) may be struck out if the authority is satisfied that at least one of the following applies to the submission (or part of the submission):

- it is frivolous or vexatious;
- it discloses no reasonable or relevant case;
- it would be an abuse of the hearing process to allow the submission (or the part) to be taken further;
- it contains offensive language;
- it is supported only by material that purports to be independent expert evidence, but has been prepared by a person who is not independent or who does not have sufficient specialised knowledge or skill to give expert advice on the matter.
