Submission on a Notified Resource Consent Application

Form 13

Sections 41D, 95A, 95B, 95C, 96, 127(3) and 234(4), Resource Management Act 1991

This is a submission on:

APPLICANT'S NAME: Global Contracting Solutions Limited

LOCATION: 401 Racecourse Road, Te Awamutu

I am/am not* a trade competitor for the purposes of section 308B of the Resource Management Act 1991.

I am/am not directly affected by an effect of the subject matter of the submission that—

- (a) adversely affects the environment; and
(b) does not relate to trade competition or the effects of trade competition.

The specific parts of the application that my submission relates to are:

The Air, Water and Land Pollution and emissions.
Human Health and goes against WDEWD plan and growth strategy for the community.

My submission is:

Support parts or all of [] Oppose parts or all of [x] are neutral parts or all of []

include— the reasons for your views.

- human health research
- International experience of similar incinerators

I seek the following decision from the consent authority:

give precise details, including the parts of the application you wish to have amended and the general nature of any conditions sought

Refuse the proposal for Resource Consent.

I wish (or do not wish) to be heard in support of my submission.

- [x] I do wish to be heard in support of my submission (this means that you will speak at the hearing)
[] I do not wish to be heard in support of my submission (this means that you will not be advised of the date of the hearing and will not speak at the hearing)
[x] If others make a similar submission I will consider presenting a joint case with them at the hearing.

You must tick one of the boxes above, otherwise it will be deemed that you do not wish to be heard and we will not advise you of the date of the hearing.

- [x] I have served a copy of my submission on the applicant. (this is required by section 96(6) (b) of the Resource Management Act 1991)

Tēnā koe e te Hearings Commissioner.

I am a resident of Kihikihi, a small town that is linked to Te Awamutu by a golf course. Very close.

My tūpuna's bones lie in the cemeteries of this land. My bones, and those of my descendents will eventually lie in them also. I am from this land and of this land.

This is why I adamantly oppose Global Contracting Solutions Limited's proposal.

I oppose the establishment of the waste incinerator proposed because it will become a major polluter, right on the doorsteps of several educational institutions, amongst a thriving community, and nearby fertile farmland.

The dioxins emitted into the air are cancer-causing. I wonder what the stated levels of 'acceptability' are for the emission of these poisons, as I see that Global Contracting Solutions have met the requirements. I wonder what these limits are set upon, and whether they take into account the accumulation of the dioxins over a year, over 4 years, over 17 years, 21 years, over a lifetime.

The reason I state these years in particular is because that's the amount of time a pre-schooler might attend Barnyard ECE, or Apakura Te Kākano Puna Whakatupu, or Puawai Te Kōhanga Reo.

17 years for the tamariki and youth that might attend these ECE and then move on to learn in the Whare o Ngā Purapura o Te Aroha.

21 years as those same graduates move into Tertiary study at Te Wānanga o Aotearoa - Apakura Campus.

And a lifetime for those born on and raised and who will die here.

International research shows that the land surrounding incinerators can be extensively contaminated with cancer-causing dioxins and furans, sulphur dioxide, nitrogen oxide, mercury and particulate matter. Consider the amount of dioxin, heavy metals, microplastics and more spewing from a 24/7 running incinerator, nestled amongst our farmland, on a floodplain, amongst educational institutions and residential areas. This can't be good, right? Nor can it be acceptable.

Accumulation of these chemicals on plants, on the ground, on the food we eat from our gardens is poison. There are no acceptable levels for human bodies to safely partake of. Dioxin in our food (livestock, fruit and vegetables) leads to bio-accumulation in our human bodies.

Our tamariki mokopuna, whose bodies are growing and changing daily, developing in the best way they can, will be eating the same food. This can't be acceptable.

What do dioxins do? Dioxins damage the human immune system and cause cancer. Studies have shown direct links to non-Hodgkins lymphoma, increases in risks of miscarriages and pre-term delivery of babies. There are links to reduced male fertility.

Exposure to particulate matter impacts those with respiratory problems such as asthma, cardiovascular issues, the elderly and children.

In the Netherlands, research conducted indicated that the high dioxin output from waste incinerators could be responsible for contamination of cow's milk and meat. As a result, the production and sales of dairy products from the Netherlands was prohibited for several years.

I'm concerned for our future, those waiting to be born. Concentrated bio-accumulation, stored in mum and dad, passed on unknowingly to the child in the embryo cannot be acceptable.

There is no human health assessment of this proposal, perhaps intentionally?.

Stormwater from the site will be discharged into the Mangapiko Stream. This water is likely to be contaminated with heavy metals and dioxin. Filtration systems and settlement ponds do not eliminate all of the toxic products meaning these will make their way into the waterways. This can't be acceptable.

The location of a heavy industrial operation immediately next to existing and planned residential housing, schools and food businesses, and operating 24-hrs/day, 7day/week is not appropriate and conflicts with the intentions of the Waipā District Plan and Growth Strategy for the community. This can't be acceptable.

In closing, please consider the risks for our people, for us here today and those left here to care for our earth and our lives tomorrow.

Nāku iti nei,
Erin Keremeta-Kapa

This plant will be situated extremely close to local Kura and childcare facilities, residential housing and other business with large numbers of employees. The toxins produced by this plant will not only affect the local residents but also have the potential to impact other via our local agricultural sector.

We have heard from a professor the damaging effects of incinerators to our health from the nano-particles that are released, especially that of the reproductive system, this will effect generations and generations to come. It will be devastating. As a young female, this makes me question my future here in Te Awamutu if I were to consider having a Pepi.

Between 2000 and 2022 there have been 48 incinerators closed, and no new incinerators built since 1995 in the United States, I think this speaks volumes of the old fashioned technology that should be redundant and has no place here in Aotearoa.

I seek the following decision from the consent authority:

give precise details, including the parts of the application you wish to have amended and the general nature of any conditions sought

To decline the application in full.

I wish (or do not wish) to be heard in support of my submission.

- I do wish to be heard in support of my submission
(this means that you will speak at the hearing)
- I do not wish to be heard in support of my submission
(this means that you will not be advised of the date of the hearing and will not speak at the hearing)
- If others make a similar submission I will consider presenting a joint case with them at the hearing.

my husband and I from 10ks from the
side of this project

We are really concerned about residue
pollution on our pasture and maize crops
and how this can enter the food chain.
Also my health with sinus and asthma

we are very concerned about the pollution
from this plant on all of our community.

We often use the feild for walks and our dogs jump in the mangapiko stream, I feel the environmental impact will make these activities unsafe.

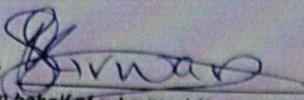

I am concerned about the wildlife that we see on these walks and how the polution will effect them.

I am also concerned about my own familys health, specifically air quality, we often spend lots of time out door, espically over summer, I have a big vege garden to provide food for my family and believe this will be negativly impacted by the incinerator.

In 2023 it is globally recognised that climate change is a major concern, why would we encourage the release of 150 kilo tons of CO2 per year. We should be working to find a climate friendly alternative.

I also work as a midwife and am greatly concerned for the health of new born babies living in the vicinity of the proposed incinerator.

The CEO,
Waipa District Council

Re: Incinerator Proposal - Racecourse Road.

Dear Sir,

I strongly oppose the above on the following grounds:-

- 1) Environmental, i.e. noise; air & soil pollution; traffic increase; health.
- 2) Disposal of toxic ash residues from the plant - not stated by Global Contracting Solutions, but an obvious hazard and problem.
- 3) Release of Dioxins and other long term contaminants into local waterways, soils and atmosphere - carcinogenic chemicals.
- 4) Property values decreased in Te Awamutu, schools becoming a hazard for children (& adults) especially from dioxins, short and long term health dangers and cumulative effects henceforth.
- 5) Soil and air pollution - I won't be able to grow or consume any vegetables from my own garden due health risks.
- 6) General buildup of toxic chemicals and waste from the site.
- 7) Proximity of Fonterra complex - contamination highly likely.
- 8) Ditto Mangapiko Stream and runoff into surrounding countryside.

In short, such a venture will create more problems than its claimed benefits. I urge Council to object to and prevent the proposed project from proceeding. Don't Burn Waipa!

Yours sincerely
John Kelleway.

I request/~~do not request~~*, pursuant to section 100A of the Act, that you delegate your functions, powers, and duties to hear and decide the application to one or more hearings commissioners who are not members of the local authority.

Submission on a Notified Resource Consent Application

Form 13

Sections 41D, 95A, 95B, 95C, 96, 127(3) and 234(4),
Resource Management Act 1991

I am/~~am not~~ directly affected by an effect of the subject matter of the submission that—

- (a) adversely affects the environment; and
- (b) does not relate to trade competition or the effects of trade competition.

The specific parts of the application that my submission relates to are:

My submission relates to the whole application.

My submission is:

Support parts or all of **Oppose** parts or all of **are neutral** parts or all of
include—

My submission relates to the whole application.

My name is Deborah Kane, I reside in my own home, with my children and grandson. We decided to live in Te Awamutu 16 years ago, as it is well suited for our desired lifestyle, 1/4 acre section, grow our own fruit trees, vege gardens, collect our own water, 3 chooks - eggs for us and neighbours, our neighbours have the bees, neighbours have sheep, in a nut shell we are all living the dream.

The incineration plant that is being proposed is a hazardous facility that appears to have no assessment on human health, the plant will be emitting nano particles which we all know it is near impossible to collect. As we are a farming community we have Fonterra on our doorstep, they use external air for their dryers to dry milk powder. Therefore all those dioxins, mercury matter, nitrogen oxides, sulphur dioxides, nano particles that are being emitted from the proposed incinerator plant will be the exact same air / toxins that will be drawn into their plant (Fonterra's) and directly onto the products they are producing (milk powder, which could

include baby formula). Attached to the email will be a basic diagram of how Fonterra's external air supply works.

Reasons for my opposition -

- Mine and my families Health will be compromised and quality of life will be shortened
- The health and wellbeing of our community including all living creatures/animals
- Potentially my home and contents insurance may be affected (insurance company will need to be notified to see what the impact will be if the proposed application goes ahead)
- My health insurance policy will be compromised and any future claims may not be covered
- Real Estate values will decline rapidly and loss of sale. Who would want to live/buy here
- No longer be safe to go outside for a walk or do any outdoor activities as our air will not be fresh
- Increased trucks on our already busy road causing vibration, noise and air quality (increased fumes from trucks) this road is a residential road and has insufficient infrastructure i.e. entrance and exit is on a blind corner, no curbing and no footpaths on parts of Racecourse Road. Increased trucks also puts risk to our young children who play outside, walk to school etc
- Taking our water resources on our already low supply and restrictions (if we already have restrictions how is this even conceivable)
- The proposed plant is going to be built in a high risk flood zone. Insurance companies are warning New Zealanders not to build in these areas as they will become uninsurable
- The EU has withdrawn all support for waste management by incineration.

Notes to submitter

If you are making a submission to the Environmental Protection Authority, you should use form 16B.

The closing date for serving submissions on the consent authority is the 20th working day after the date on which public or limited notification is given. If the application is subject to limited notification, the consent authority may adopt an earlier closing date for submissions once the consent authority receives responses from all affected persons.

If you are a trade competitor, your right to make a submission may be limited by the trade competition provisions in Part 11A of the Resource Management Act 1991.

You must serve a copy of your submission on the applicant as soon as reasonably practicable after you have served your submission on the consent authority.

If you make your submission in hard copy please deliver to Waipa District Council, 101 Bank Street, Te Awamutu or 23 Wilson Street, Cambridge or post to Private Bag 2402, Te Awamutu 3840

If you make your submission by electronic means, a signature is not required. Electronic submissions on resource consent applications must be directed to submissions@waipadc.govt.nz.

If you make a request under section 100A of the Resource Management Act 1991, you must do so in writing no later than 5 working days after the close of submissions and you may be liable to meet or contribute to the costs of the hearings commissioner or commissioners. You may not make a request under section 100A of the Resource Management Act 1991 in relation to an application for a coastal permit to carry out an activity that a regional coastal plan describes as a restricted coastal activity.

Please note that your submission (or part of your submission) may be struck out if the authority is satisfied that at least one of the following applies to the submission (or part of the submission):

- it is frivolous or vexatious;
- it discloses no reasonable or relevant case;
- it would be an abuse of the hearing process to allow the submission (or the part) to be taken further;
- it contains offensive language;
- it is supported only by material that purports to be independent expert evidence, but has been prepared by a person who is not independent or who does not have sufficient specialised knowledge or skill to give expert advice on the matter.

rubbish filled trucks, tearing up our already disrepaired roads, benefit Te Awamutu?

How does sending toxic emissions, particulates too small to be 'scrubbed out' before being released into our air ^{benefit Te Awamutu?} The 2016

HAPINZ 3.0, (Health and Air Pollution in NZ 2016) study cited the thousands of deaths due to air pollution just from domestic fires, motor vehicles, industry and windblown dust, not even considering dioxins and nanoparticles which science proves cannot be captured, nor scrubbed out of emissions which will release from this proposed waste to energy incinerator. Science proves that dioxins are cancer causing and they accumulate in human bodies and ^{are} so bad that a mother will pass to her unborn baby in the womb and then into breastmilk.

Livestock, farming and agriculture will be impacted negatively. Nanoparticles so fine will be carried thru the air then will settle on unsuspecting hosts, people, plants and livestock.

I have my doubts about the integrity of the applicant GCSL, also they have no experience whatsoever in this incineration process and also, I believe, have backing from offshore, which leads me to suspect when feedstock is low, offshore waste products will be invited with open arms. Rosetown will become known as Rubbish town.

there are too many scenarios I foresee that will not be beneficial short or long term
PTM

for our town, The only beneficiaries will be those stoking the fires and collecting the cash.

As far as employment opportunities, Zero waste regeneration, recycling, reusing, repairing also creates job opportunities and benefits are far reaching for the environment. People using their energy to create circular economy not linear, the benefits are immense personally and for our wider community.

Thankyou for your consideration

My name is Roger Kane, I reside in my own home with my wife, 2 children and grandchild, we have 3 chooks , we pride ourselves with living sustainability , ie collect our own water , composting , grow our own fruit and veges , upcycle , recycle .

We moved to Te Awamutu as it is quiet , clean and good ecological footprint. Beautiful views of both Maungatari and Pirongia Mountains .At night and day its a pleasure to here the Tuis and Moreporks with other feathered friends.

There appears to be no written evidence of how the ' Human health ' will be impacted ,this is concerning as the proposed plant will emit cancer-causing dioxins , as well as sulphur dioxide,nitrogen oxide,mercury matter.What is worse will be the nanoparticles which are near impossible to stop being released into the air .This will be released into the air and adversely affect our farming community ,agriculture community and most damaging to our communities children , toddlers , babies , at barnyard Child Care - across the road from 410 Racecourse Road Te Awamutu

If the proposed application goes ahead , would the HIGH RISK Flood zone the plant is to be built on - then this would divert the natural flood waters to another course ie - closer to residents housing and or adjacent productive farmlands

Why Should anyone - anywhere in NZ live under the shadow of this TOXIC - SMELLY - NOISY - Life KILLING plant

I Oppose this application- as it will adversely affect

- *My Health*
- *My Families Health*
- *The Health and wellbeing of our community*
- *Potentially our Home may not be insurable*
- *Loss of real estate vale*
- *Quality of life unbearable*
- *Loss of our rights to go outside and breathe fresh air*
- *Increased trucks ,heavy vehicles going past causing vibrations and noise ,air quality (Fumes)*
- *More wear and tear (Damage to our roads)*
- *Taking our water resources ,we already have water shortages and restrictions*
- *Water discharged from the plant will pollute our waterways ,killing all creatures*
- *There is no safe level of dioxins ,these toxins will build up in human fat tissues and in animals*
- *The proposed plant is to be built in a high risk flood zone (that is crazy) Insurance companys are warning NZ not to build in these areas,they will become uninsurable*
- *The EU has withdrawn all support for waste management by Incineration (FACT)*
- *This plant needs to burn thousands of litres of diesel to be able to operate (Fact)*
- *The size of multiple large stacks will not fit in with the area (an eye sore) also the location is on the direct flight path to Hamilton airport,*
 - *Is there any communication been made with Hamilton Airport, control tower re potential flight path diversion due to height restrictions*
- *The list just goes on and on and the risks from this out dated diesel burning Technology producing Toxic ash which has to go to landfill somewhere*

I am directly affected by an effect of the subject matter of the submission that—

- (a) adversely affects the environment; and
- (b) does not relate to trade competition or the effects of trade competition.

The specific parts of the application that my submission relates to are:

My submission is:

Oppose parts or all of
include—

- *Our submission relates to the whole application, we oppose this application. We want Waipa District Council to decline this application.*
- *Use of fossil fuels to run an incinerator that emits toxic waste via air and ash would be a deterrent to meeting our environmental emission targets and in real contrast to the clean green environment we currently are known for worldwide. At a time when we are reducing the use of fossil fuels this request comes through which is run on diesel....It does not make sense.*
- *A lot of countries are closing incinerators due to the above effects.*
- *This incinerator would be a first in New Zealand, we don't have the rules, regulations or the harsh penalties established if things go wrong and an environmental incident occurs - an explosion on site with a volunteer fire brigade is not enough to save the health and welfare of all peoples, animals and the environment.*
- *The owners have no history or experience in operating an incinerator so will be trial and area at the risk of an environmental disaster.*
- *Who's going to monitor the emissions from the stacks on a daily ongoing basis, to insure they are within limits or see the toxic ash goes back to a lined landfill without causing an environmental incident? What are the penalties for non-compliance when the risk is so great to people. animal life and the environment. Eg Open Country Cheese dairy factory has had multiple environmental discharge convictions to the local stream, and it is cheaper for this company to pay the fine than fix the problem, will this be the same for the incinerator air discharge in the Waipa district which could kill people.*
- *Waipa is part of the mighty Waikato which is a huge farming area, toxins and dust could affect animals, fish, waterways and pastures which in turn will affect the health of the people through food consumption and use of water.*
- *The proposed incinerator building itself is in a highly populated residential area, close to an Early childhood centre, College and Primary school, plus a food preparation factory at Fonterra and the popcorn factory, in a flood zone near an important waterway through Te Awamutu, a proposed*

Sections 41D, 95A, 95B, 95C, 96, 127(3) and 234(4),
Resource Management Act 1991

residential area at the racecourse, and should not be allowed to build in this area due to the above along with the factory producing noise, the toxic emissions from the stack and the toxic ash which needs to be removed from site to landfill.

- *Factory runs 24/7, what are the noise levels going to be like?*
 - *The environmental impact of 200 trucks from all over the North Island transporting rubbish into Te Awamutu on roads not fit for this purpose, there is already issues with vibration on the main road with the waterpipe being installed to Taylor Hill water tank and then 50 trucks loaded with toxic ash to take to landfill. Racecourse road is not wide enough for this many additional trucks to run daily.*
 - *What happens if there is an incinerator factory breakdown or they run out of diesel (we have had issues with diesel supply in the past), what happens with the waste the 200 trucks are bringing into the factory premises?? Will the emissions be at required levels or due to cooling at greater toxic levels?*
 - *Incinerator is to burn waste to remove from landfills however toxic ash needs to be in lined landfills, where are these landfills going to be? Will the transportation, loading and dumping of this toxic ash be covered at all times to reduce contamination of waterway and the air which affects all in the area.*
 - *Our major concern is the health and wellbeing of the people, animals/fish and the environment in the Waipa and the rest of New Zealand that the toxic micro dust will accelerate, we have issues with a struggling health system now without adding additional victims into the system. This incinerator needs to be declined; it is not for New Zealand. Raglan have proved a circular waste management system works very well. Do not need an incinerator that is a linear waste management system. EG, Australia had their forest fires, we experienced ash fallout in New Zealand, due to the wind currents.*
 - *The effect on food production from our biggest employer Fonterra, if the Dioxins and nano particles enter the factory and get into the product, this could affect our clean green image and greatly affect our export market regulations which in turn would affect all our dairy farmers in the country with possible closure of Fonterra and huge job loss across the country.*
 - *Building in a flood zone and next to a waterway, we would have thought was not possible now with Councils being more aware not to have buildings in these areas with the local floods in other areas of New Zealand and with insurance companies tightening down on industries in these types of zones.*
 - *Where are the environmental Impact statements and the health risk assessments that should be included with the incinerator building request? Waikato is not a good area for asthmatics or other breathing conditions and having additional Dioxins and nano particles in the air will not be of benefit with any breathing health issue. Michael is an asthmatic, and his mother has another breathing condition (COP).*
 - *Having an incinerator in town will probably affect house valuations and selling prices, a lot of people retirement funds locked up in their homes.*
-

If you make a request under section 100A of the Resource Management Act 1991, you must do so in writing no later than 5 working days after the close of submissions and you may be liable to meet or contribute to the costs of the hearings commissioner or commissioners. You may not make a request under section 100A of the Resource Management Act 1991 in relation to an application for a coastal permit to carry out an activity that a regional coastal plan describes as a restricted coastal activity. Please note that your submission (or part of your submission) may be struck out if the authority is satisfied that at least one of the following applies to the submission (or part of the submission):

- it is frivolous or vexatious;
- it discloses no reasonable or relevant case;
- it would be an abuse of the hearing process to allow the submission (or the part) to be taken further;
- it contains offensive language;
- it is supported only by material that purports to be independent expert evidence, but has been prepared by a person who is not independent or who does not have sufficient specialised knowledge or skill to give expert advice on the matter.

Submission on a Notified Resource Consent Application

Form 13

Sections 41D, 95A, 95B, 95C, 96, 127(3) and 234(4),
Resource Management Act 1991

This is a submission on:

APPLICANT'S NAME: Global Contracting Solutions Limited

LOCATION: 401 Racecourse Road, Te Awamutu

I am/am not* a trade competitor for the purposes of section 308B of the Resource Management Act 1991.

I am/~~am not~~ directly affected by an effect of the subject matter of the submission that—

- (a) adversely affects the environment; and
- (b) does not relate to trade competition or the effects of trade competition.

The specific parts of the application that my submission relates to are:

My submission relates to the whole application.

My submission is:

Support parts or all of **Oppose** parts or all of **are neutral** parts or all of
include

I oppose this proposal going ahead for a number of reasons including:

- I have lived in Te Awamutu all my life and I am proud of our town and feel it has been a safe and healthy environment to bring up a family. I would not like to see this jeopardised any way. I live within an approximate 2.5 km radius of the proposed plant and am concerned for the health and wellbeing of me and my family, and for the environment that we live in.
- This proposal is not an environmentally sustainable option for managing waste. We should be looking to initiate environmentally friendly options for managing our waste, including reducing volumes of waste produced and ensuring recoverable materials are not incinerated. Supporting initiatives that allows us to keep producing waste at an alarming rate further enables us to produce waste and disincentivises renewable energy options, rather than looking for ways to decrease the amount of waste we produce as a nation. It is inevitable that a certain amount of recoverable materials are destroyed in this type of process. Any new waste management plan needs to focus on ensuring recoverable materials are recycled and reused. This proposal will severely affect the image and reputation of our town, should it be allowed to go ahead. This has large economic impacts for individuals and businesses in Te Awamutu.
- The health implications for the residents of Te Awamutu will be jeopardised. This is an infringement on our rights as citizens of the Waipa district, to enjoy clean, unpolluted air, soils and waterways. Toxins, heavy metals and persistent organic pollutants are not destroyed in the incineration process and inevitably end up either escaping the smokestack filters or going into landfills. Those pollutants that escape the filters settle on surrounding land and accumulates over time. This has huge impacts on our health and particularly the health of our unborn children. Toxins end up in our kai moana and kai awa, and then these are ingested, creating another avenue for detrimental health outcomes. There is also long-term damage to our flora and fauna, upsetting the equilibrium of our environment. We have an obligation under Te Tiriti o Waitangi to recognise and protect the rights and interests of Māori, ensuring kaitiakitanga and protecting Papatūānuku.
